tar.gz file with you. Nov 17, 2560 BE n Today is the day to come back to the Buildbox world! We're going to be releasing four .tar.gz files, for each of the Buildbox tools, over the course of the next few days. Nov 10, 2560 BE n The Buildbox Tools Team is continuing to work hard. For our nearest future (December), we're planning on finalizing the release of the Mac and iOS Apps and the "automated tools" on the Buildbox. There are more developments to be made for the rest of the year, but we're keeping our expectations low and we're trying to come up with the best solutions we can, so we can have the best results for our customers. Our next "big news" should arrive early next year. Aug 17, 2560 BE n Everything's been under control, very well. We've been watching the market development closely and adjusting the prices accordingly. The first waves of installation have just finished on the Buildbox products (beta version). First customer is very satisfied with it. His biggest concern was about

the reliability of the installation. We could have even done that ourselves, without creating any additional problems for our customers. But this is a great first step. We're looking forward to the feedback from our customers. At this moment in time, I cannot tell you exactly when the buildbox versions will be released. We have to do some adjustments on our side. The current version of the buildbox Tools is "v.12". It's a little bit delayed because we had a little bit of problems with our distributor, for the last weeks. They have been getting new orders, and the first shipments are delayed. We've just finished shipping out a beta version to some new customers, and we've also set up a demo version for our current customers. We'll start sending the installers to them, in the next couple of days. But don't worry about it. We're going to have the buildbox versions out, first or second week of September. If you have any questions, feel free to contact me. Thx for your patience! May 6, 2560 BE n The Buildbox Team is working hard on the new Software Version of the Buildbox Platform. It's currently in a quite early stage 82157476af
